125mm Eddy Current Tangent Test Coil Platform for Testing Welded Tube

- Handles material up to 125mm diameter.
- Easy to mount and install.
- Test coil can cover up to 60 ° circumference.
- Simple test head adjustment for 10:00 - 2:00 o'clock weld wandering.
- Mill control signal can move test head out of the way to avoid butt weld or open welds.
- Works with MAC existing electronics.
- Can test using Flaw and (optional) Absolute mode, in combination.
- Spring-loaded, ergonomic design allows easy off-line coil setup or replacement.
